Attitudes are a construct of internal beliefs and value systems. Attitudes, capability or circumstance influence observed behaviour. Use caution when assessing attitudes and use behaviours as examples. Feedback and behaviour management can change attitudes. Changing attitudes can also change values and beliefs and vice versa.

The Relationship Between Beliefs, Values, Attitudes and ...

A belief is an attitude that something is the case, or that some proposition about the world is true. In epistemology, philosophers use the term "belief" to refer to attitudes about the world which can be either true or false. To believe something is to take it to be true; for instance, to believe that snow is white is comparable to accepting the truth of the proposition "snow is white".
