You will learn how to express and document the design and architecture of a software system using a visual notation.

Software Design and Architecture | Coursera

Udemy Editor. Software design is a process through which the software requirements are represented via a proper plan which highlights all the requirements and specifications which have to be considered by the programmer for writing the code for the software. The software design document lays out this plan in a systematic manner and provides a clear pathway as to how these requirements are going to be met by the programmer.
