The Ice Balloon tells the story of S.A. Andrée and his attempt to cross the North Pole in a balloon in 1897. The subtitle, the Heroic Age of Arctic Exploration, is a bit too ambitious for this volume and the examples chosen by Wilkinson do not, in my opinion, do much to illuminate Andrée's story.

All around the balloon is white from snow and ice, and the sky is white from fog, so there is no horizon, and only a fine line, which the balloon delineates, between the background and foreground. The photograph is not entirely in focus, which makes it appear to be more a print than a photograph, and so somehow obscurely unrealistic, or, on the other hand, realistic in an exaggerated way.

The next day, cut the balloons off the ice and start investigating! First, we explored the ice with a magnifying glass and flashlight. It was neat to see the variations in the ice under the light. We looked at the ice in the dark, too. Next, we added salt. The ice started to melt quickly! Finally, we added just a drop of food coloring to each ...

Andrée's Arctic balloon expedition of 1897 was an effort to reach the North Pole in which all three Swedish expedition members - S. A. Andrée, Knut Frænkel, and Nils Strindberg - perished. Andrée, the first Swedish balloonist, proposed a voyage by hydrogen balloon from Svalbard to either Russia or Canada, which was to pass, with luck, straight over the North Pole on the way.

The balloon appeared for three Parades, and was retired after the 2017 Parade. It is unknown if this balloon will ever return, as no further installments of the Ice Age movies have been announced so far. Originally, Scrat's Acorn was scheduled to make a solo comeback in the re-imagined 2020 Parade, classified as a generic novelty balloon.
